DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mead (US4912716) in view of Taylor et al. (US4666255). Mead shows in Fig.3 a laser oscillator 13 and a microwave oscillator 18. Mead does not disclose a single sideband mixer. Taylor teaches a single sideband mixer (modulator) (col.1, l.18-29) and it would have been obvious to one of ordinary skill to understand that a single sideband mixer **must include** the elements recited in claims 2 and 4 in order to function as a single sideband mixer. Therefore, for the benefit of outputting a single controlled frequency signal, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Mead a single sideband mixer as taught by Taylor.
